## EXPERIENCE

---

### Maximum Education

Aug. 2019 – Nov. 2021

*Informatics (EGE) teacher*

- Had more then 60 students, all of them successfully passed exams
- Gained useful skills: **communication, explanation, stress resistance, responsibility, basics Python skills, time-management.**

### Intel

Nov. 2021 – Present

*DevOps Intern*

- Worked on Intel Python and Intel AI Kit infrastructure.
- Gained useful skills: **Python and bash scripts, CI/CD (TeamCity), Git (Github), Jira experience (Scrum/Kanban), Linux experience, managing environments with Conda.**

## PROJECTS

---

### GoodBoy Bot

- Telegram bot with dogs breed detection. Our team won 2nd place in Intel Summer Camp 2021.
- We did a 4 tasks - detection, classification (using opencv and opencv), data collection (using BeautifulSoup4 and requests) and Telegram bot (using aiogram).

### MU Quiz Bot

- I did Telegram bot (using aiogram) with quizzes about my favourite football club.
- Features: all users can add own questions and I (and some other people, who know password) can moderate new questions in a live mode.

### CS:GO Betting Bot

- I did Telegram bot (using aiogram) with betting to CS:GO matches with free virtual coins. I created it for you-tuber. This bot was used for a contest among subscribers (the main rule was to collect more coins out of 1000 in one tournament).
- Features: all users can bet any available amount of coins on an esports match. Bot can update matches, their live scores and results in live time. For these tasks I created the API for hltv.org (website with information about esports).
- Bot was deployed on virtual Linux machine and was completely autonomous.

## EDUCATION

---

### CMC MSU, Lobachevsky University

2017 – 2020, 2021 – 2023

- **Current course:** IITMM (Institute of Informational Technologies, Mathematics and Mechanics), Specialization: FIIT (Fundamental Informatics and Informational Technologies), 3rd course. I started studying in Lobachevsky from 4th semester after transfer from MSU.
- **Skills:** Linear algebra and analytic geometry (MSU), Mathematical analysis (MSU), Mathematical statistics (MSU), C/C++ (MSU and Lobachevsky), Computer Graphics (Lobachevsky), Image Processing (Lobachevsky), DevTools (Lobachevsky), Parallel Programming (Lobachevsky).

### Intel Summer Camp

2021

- **Place:** 2nd place with our GoodBoy Bot project
- **Skills:** Neural networks, Machine Learning, Python 3, Data collection from Internet with Python, creating telegram bot experience.

## Self-education

- **Courses:** Python basics, Python programming, Linux Introduction, DevOps Introduction.
- **Links:** <https://disk.yandex.ru/d/Y8ligB2wPhWJnw>

## SKILLS

---

**Languages :** Python (aiogram, cv2, BeautifulSoup4, Matplotlib, requests), C, C++.

**Tools :** Git, TeamCity, Jira, English (Intermediate), Working with APIs (Jira API, TC API, GitHub API).

**Soft Skills :** Motivated, punctual, communicable, responsible, team work.
